Tim Haunn  
President  
The Haunn Group

Having been approached by a number of financial advisors in the past, we have been skeptical on the quality of service we could expect.

We actually met Tim through a personal home building experience and found him to be very professional, knowledgeable and actually quite a likeable fellow – for a financial advisor.

All kidding aside, one of the reasons we decided to work with Tim and The Haunn Group, was the personal interest they took in our situation as well as providing excellent services in charting a course in health, wealth and legacy for ourselves and our family. We thank them for assistance in choosing sound investments and implementing effective tax related planning

Being in our own business, we appreciate the fact that Tim actually comes to our place of business, on a regular basis, to discuss our portfolio at a time suitable to our busy schedules. The Haunn Group's values of "Act With Integrity" and "Be Accountable" are evident in their commitment to putting the needs and goals of their clients first.

We're very pleased with the direction in which our portfolio is headed and highly recommend their unique vision of putting the "why's" before the "how's". We thank Tim for the patient and respectful manner with which he is coaching us and for an excellent job in assisting us in clarifying and prioritizing our short and long-term financial goals.
